

We thank God for the many volunteers who have made the Chapel project possible. Their gifts of time and money are so appreciated!

*Evangelical Covenant Church (Lafayette, IN)* sponsored the first mission team to work on this project. They gutted the space, rewired the electrical, added insulation, installed drywall for the upper part of the chair rail, built the stage, purchased the basement windows, installed the new door in the basement, stained and varnished boards for the ceiling and lower part of the chair rail, as well as starting their installation.

*Popejoy Heating and Cooling (Lafayette, IN)* installed the central heat and air for the cost of materials.

*West Bay Covenant Church (Traverse City, MI)* finished staining and installing the wall and ceiling boards, added the new emergency exit with new stairs, and installed basement windows, as well as the two windows at the front of the church.

*Ball State Catholic Student Union and Christian Student Foundation (Muncie, IN)* removed layers and layers of paint from the church pews and painted the upper part of the chair rail.

*Donna Larson (Greensboro, NC)* designed and constructed stained glass windows for the front windows.

*Friends of the Camp from Wallens Creek Covenant Church* stood in the gap when we needed help staining wall and ceiling boards, working on finishing touches, and refinishing pews.
